# An innovative training tool for ventilatory assistance

GEORGES

Georges is a **connected, high-fidelity mannequin** for training healthcare professionals and caregivers in **non-invasive and invasive ventilation**, through interactive, personalized clinical scenarios.

Why choose Georges?

1 — *Hands-on, immersive training, wherever you are*

2 — *Learn, adjust, observe: real-time feedback*

3 — *Advanced simulation tools: patient profiles, respiratory events, leaks, alarms, etc.*

A SOLUTION DEVELOPED BY KERNEL BIOMEDICAL

An innovative tool to ensure **effective training.**

GEORGES
Air Play

📱 *The integrated software enables the trainer to **simulate realistic clinical situations**, based on a list of cases created by healthcare professionals*

🫁 *Manipulate and evaluate your actions! Participant interface **displays patient's ventilatory signals in real time***

🛠️ *Take advantage of Georges'*
100% customizable scenarios:

- *Ventilator selection and adjustment*
- *Managing interface and leaks*
- *Reaction to alarms...*

Contact us and schedule your training session with Georges today!
